Phoenix Supplier Code: 08436

Subject: Approval of Controlled Processes by Honeywell Engines
(Applicable to CAGE Codes: 99193, 91547, 9AA11, 62623 and 64643)

The Honeywell Engines Supplier Survey Committee has reviewed and approved your facility for the controlled process specifications listed below. This approval is contingent upon your company's ability to comply with these requirements as dictated by the contract/specification.

This approval letter is valid only until this approval appears on the Approved Processing Source List(s) (APSL), which takes approximately one week. The APSLs are available at the Honeywell Engines & Systems Supplier Site, and they are to be reviewed regularly per SPOC 165. The Honeywell Engines APSLs are the official identification of a supplier's approval status. If in the future, you do not appear on the applicable APSLs for reasons that you have not received notification of, please contact supplier.survey@honeywell.com to inquire about the reason for disapproval.

The approval may be extended beyond the expiration date based on the results of a process approval evaluation to be scheduled and conducted by a Honeywell ES&S Certified Auditor. No action is required from the supplier to schedule the audit.

If you have any further questions regarding the approvals noted below, you may contact the supplier survey committee via e-mail to supplier.survey@honeywell.com

Process Approved	Use	Type/Class	Title	Approval Expiration	Limitations and Comments
EMS52353	S	II/CA II/MT II/ME II/MH II/OT II/SP	Approval Of Testing Laboratories For Metallic Materials	01-NOV-2004*	Categories CA: F2, F3, G1, G2, G3, G4, G5, S, W1, W2 MT: A, B, C, XA, N, XN ME: L, L1, XL, L2, L3, L4, L5, L6, L7, L8, L9 MH: M1, M2 OT: Q SP: Z, & Z3

* A short-term approval was issued because supplier does not have SCA (Source Certifying Agent) for Materials-Testing. Complete attached request for SCA and submit to supplier.survey@honeywell.com to initiate qualification process.
