BLUE ORIGIN

SQ-14352

March 26th, 2026

Dawn Talbot-Stokes
Element – PTI Industries
2 Peerless Way
Enfield, CT 06082

Dawn,

Element-PTI Industries' Blue Origin Special Process Approval to perform Gross Cleaning per CMSP-02292 Method 1 Class 1; Passivation per Method 1, Types 2 & 6, and Method 2 per AMS 2700; and Precision Cleanliness Verification and Packaging per CMSP-02292 **is granted through 25th March 2028**. This permits PTI to perform these processes for Blue Origin production parts to the extent, restrictions and limitations as detailed in the following pages.

Thank you for your cooperation and flexibility in completing this audit.

Best regards,

John Appleby and Marilyn Parga

Blue Origin Special Process Approval Assessment

Lead Auditor:	John Appleby
Audit Team:	John Appleby, Marilyn Parga
Audit Dates:	15 March – 26 March 2026 (Remote desktop audit)
Supplier:	Element - PTI Industries (Enfield, CT)
Location:	2 Peerless Way Enfield, CT 06082
Commodity:	Precision Cleaning per CMSP-02292 Method 1 Class 1; Passivation Method 1 Types 2 & 6 and Method 2 per AMS 2700; Precision Cleanliness Verification and Packaging per CMSP-02292.
Audit Scope:	The scope of this audit is to review and re-assess Element-PTI for its special process capabilities and effectiveness to support production parts for Blue Origin programs.

Applicable Blue Origin Special Processes

Blue Origin has approved Element-PTI Industries (Enfield, CT) as a special processor for the following processes as of March 26th, 2026:

Checklist	**Blue Origin Special Process**	Approved Processes	Processes Audited
AMS 2700	Passivation of Corrosion Resistant Steels, Method 1 Type 2 & 6, Method 2	X	X
CMSP-02292	Cleaning, Method 1 Class 1	X	X
CMSP-02292	Precision Cleanliness Verification & Packaging	X	X

Summary of Audit

Blue Origin performed remote desktop re-assessment special process audit of Element-PTI's Enfield, CT facility. The review consisted of historical documents/records, delivered quality, and process review of PTI's ability to meet Blue Origin requirements as a special processor of CMSP-02292 and AMS 2700.

No Major or Minor audit findings were observed. One opportunity for improvement (OFI) was identified related to employee vision testing. Although it isn't explicitly stated in the Blue Origin specification or IEST standard exactly what exam should be used to verify visual acuity, it is recommended that Element-PTI consider using the Jeager chart to verify visual acuity at the distances required for VC level inspections. The Jeager method best tests near vision acuity where the Snellen method tests distance vision acuity.

PTI Industries' Blue Origin Special Process Approval to perform Gross Cleaning per CMSP-02292 Method 1 Class 1; Passivation Method 1, Types 2 & 6 and Method 2 per AMS 2700; and Precision Cleanliness Verification and Packaging per CMSP-02292 has been **granted full Approval through 25th March 2028**.
